

MAXIMUM MAN/DAY PERIODS IN CERTIFICATION INSPECTIONS (EN 17065)

SCA determines the time needed for each client to plan and carry out a full and effective audit of the client's management system. The following items are taken into account in determining the audit/inspection period on a man / day basis:

- The scope of the activity/protection type/test requirement applied for
- Sample examination/audit process
- The number of personnel working within the scope of certification,
- Organizational structure,
- Addresses where the activity took place,
- The size and number of facilities, their geographical locations and multiple facility evaluations,
- Requirements of the relevant Management System standard,
- The extent and difficulty of the scope
- Results of previous audits

In determining the certification fees, the man/day fee is 500 €.The maximum man / day periods determined in the product certification audits are as follows:

Scope	Related Standards / Modules	Maximum Duration
2014/34/EU Equipment and Protective Systems Intended For Use In Potentially Explosive Atmospheres	ANNEX 3-Module B	Mechanical Tests Per Test 1 person half a day
		Electrical Tests vary according to the requirements of the Protection Type (half a day-between 28 days)
